

Gmail Integration

Church Windows has updated email integration to utilize **Gmail's OAuth 2.0 authentication**, enhancing security in alignment with Google's latest requirements. This update replaces previous SMTP configuration methods for Gmail accounts.

Adding Gmail as Your Email Service Provider

1. Navigate to Email Settings
2. Select Email Provider
 - When prompted to choose an Email Service provider, choose Gmail.

Setup Email

Email Provider:

Gmail Other

Display Name (For 'Email Settings:' Internal to this program only)

'From' Email Address ?

Type to Search

? * Click for important tips to help prevent your e-mail being marked as 'spam'.

OK Cancel

3. Enter Display Name and Email Address:

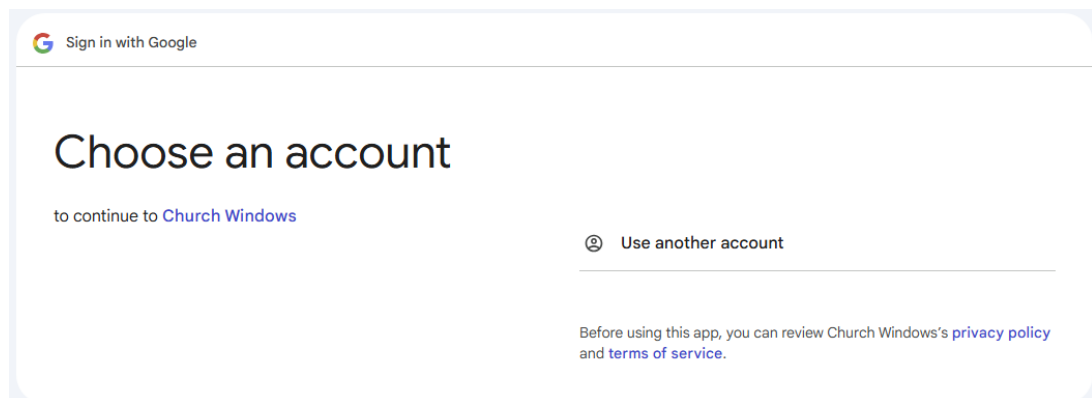

- **Display Name:** This is the name that will appear in the "From" field when recipients receive your emails.
- **Email Address:** Enter your Gmail address

Authenticating with Google

After entering your Gmail information, you'll set up authentication to give Church Windows permissions to route emails through your Gmail account. This should be a one-time process, unless there are significant changes to your Gmail account.

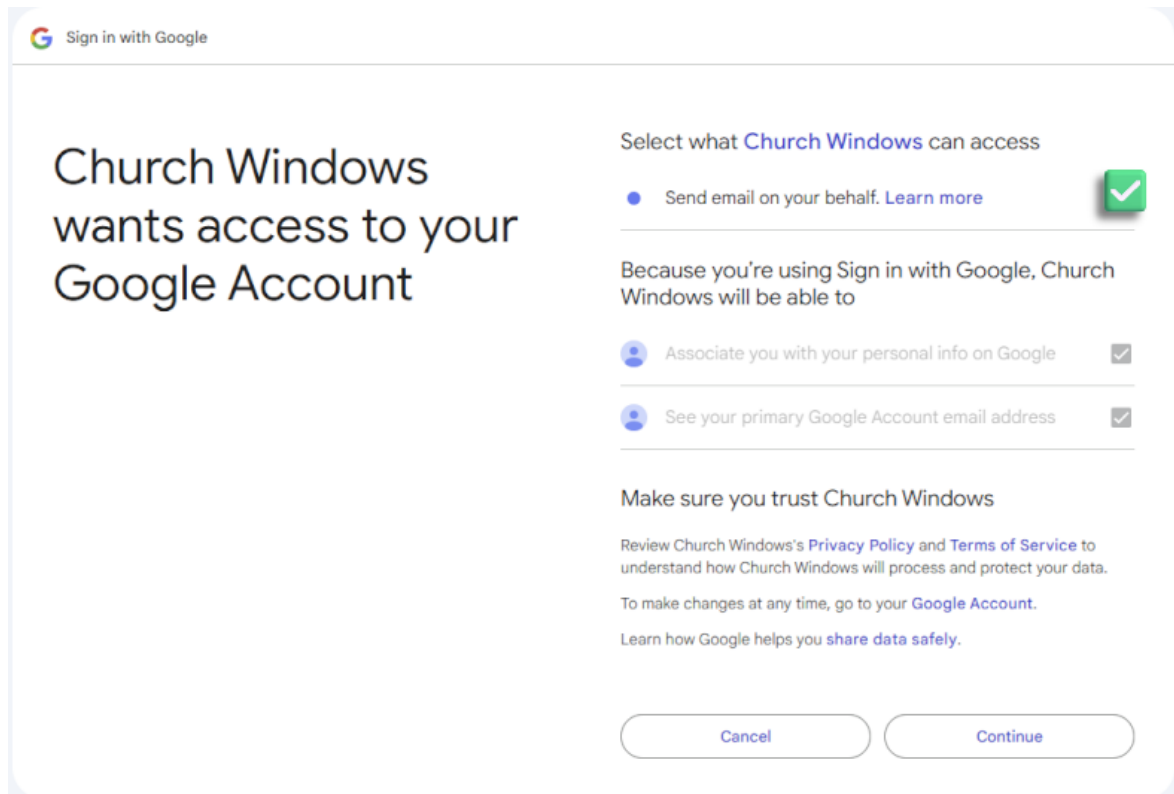

1. Sign in to Google

- **Sign In to Google:** A Google sign-in window will appear where you'll log into your Gmail account

2. Grant Permissions

Check the box that will allow Church Windows to send email on your behalf.

Sign in with Google

Church Windows wants access to your Google Account

Select what **Church Windows** can access

- Send email on your behalf. [Learn more](#)

Because you're using Sign in with Google, Church Windows will be able to

- Associate you with your personal info on Google
- See your primary Google Account email address

Make sure you trust Church Windows

Review Church Windows's [Privacy Policy](#) and [Terms of Service](#) to understand how Church Windows will process and protect your data.

To make changes at any time, go to your [Google Account](#).

[Learn how Google helps you share data safely.](#)

3. Upon successful authentication, you'll see the following message that confirms you've completed Gmail authentication and can now send emails using your Gmail account.

OAuth 2.0 Authentication Token Received

Received verification code. You may now close this window.
